

AMPP Italy Chapter is proud to announce that during the conference, on June 10th, a one day-long workshop will be organised by

Guidelines for material selection and qualification for safe transportation of H₂-NG mixtures in EU pipelines

This EU-funded project aims to develop guidelines for material selection and qualification for the safe transport of hydrogen (H₂) and hydrogen-natural gas blends (H₂NG) in both new and existing pipelines. Running from 2023 to 2026, it involves key industrial and research partners: **TENARIS, CPW, OCAS, RINA - CSM, SHELL, ROSEN, and NaTran.**

In collaboration with **EPRG** as external advisor, the project will support future hydrogen infrastructure through advanced testing and contributions to standardization.

The goal of the workshop is the dissemination of the obtained results, have a collective dialogue and obtain feedback from hydrogen community.

Chairpersons: Gianluca Mannucci – RINA - CSM
Andrea Bufalini – RINA - CSM
Mihaela E. Cristea – TENARIS

We look forward to seeing you on June 10th!
